

YOU'RE INVITED!

THE WEINIG TECHNOLOGY EXPO

April 19 & 20, 2018

Are you ready? 2018 is on pace to show the highest growth in the US economy since the end of the Great Recession in 2009. Housing starts

reached a ten-year high in November and the economy is soaring as confidence continues to grow. Now is the time to invest in technology that will increase your efficiency and throughput so you are able to meet the growing demand for wood products in the US. Don't delay!

You're invited to see more than 30 powered machines showcasing the latest solid-wood and panel processing solutions. See EnVision software which allows you to order your products and send them immediately to the manufacturing floor all at once. And discover the Weinig Service App—on display to show our new "smart factory" capabilities.

If you are ready to take your business to the next level by increasing profits in 2018, **THINK WEINIG.**

Expo Details

HIGHLIGHTS SOLID WOOD

Powermat P2400

- CNC-controlled axes with feed speeds up to 100 m/min
- Integrated joint system delivers excellent quality, even at maximum output
- Quick and easy set up with Comfort Set
- Suits a variety of applications including 3D structuring and contour milling

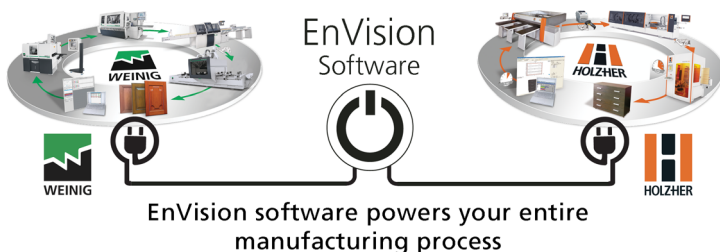

HIGHLIGHTS PANEL PROCESSING

Dynestic 7505

- Heavy-duty, dual-drive gantry design
- Available 15 HP router spindle and 24-drill head
- Automatic tool changer and space-saving light bar safety system
- On board CAMPUS software included
- Available in two nesting models—"classic" stand-alone and "push" load/unload automation

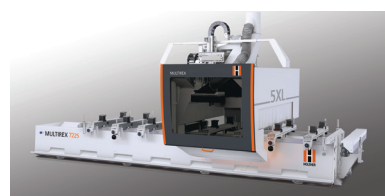

Think Smart Factory. Think WEINIG!

WEINIG Service App

The direct line to your WEINIG Partner

W4.0 digital

See new ideas to help your company compete in an ever-changing marketplace.

Get the latest information in:

- Quick set-up Powermat moulders
- Moving blade rip saws with smart ValuRip infeed systems
- The most advanced cross-cut saws on the market today
- High speed scanning for both ripping and cross cutting
- Comprehensive product portfolio for finger jointing

See our solid-wood technology in action:

- Oscillating spindle moulders for producing textured surfaces
- Complete lineal moulding cell
- Cabinet door cell with complete 5-piece production
- State-of-the-art scanning systems
- Jointing technology

See our panel processing technology in action

- Automated material handling systems to reduce labor and increase efficiency
- New edgebander technology with servo automation
- PUR adhesives and new glue delivery systems
- Wide belt sanding technology for lacquer/sealer, veneer, and solid wood sanding

And even more panel processing technology

- Automated manufacturing cell
- Servo-automated edgebanders
- Advanced wide belt sanders
- Complete cabinet door manufacturing cell

Nobody in the industry can put **ALL** facets of solid wood and panel processing together with the expertise and know-how of WEINIG and HOLZ-HER.

Come by and let us show you how.
